### Policy on Energy & Environmental Conservation

#### Policy Statement

Shree Devi Institute of Technology, our Energy & Environmental Conservation Policy initiative reflects our commitment to environmental protection and sustainability. By focusing on reducing energy consumption and enhancing efficiency, we aim to lower our carbon footprint and minimize environmental impact through renewable resources such as solar panels. This proactive approach ensures our operations are cost-effective, responsible, and environment friendly. Complementing this, the Environmental policy integrates sustainability with education to foster eco-friendly behaviours both on and off campus. As essential elements of our energy & environmental conservation policies, use of rainwater collection to minimize water usage and vermi-compost to manage the organic waste sustainably. Together, these policies not only contribute to a safer and more secure campus environment but also play a crucial role in mitigating climate change and conserving natural resources.

#### Scope of the Policy

This regulation covers the academic area and canteen on the Shree Devi Institute of Technology campus as a whole.

#### Objectives

- Shree Devi Institute of Technology strives to reduce energy consumption by adopting energy-efficient technologies and renewable energy sources (solar panels).
- To enhance energy efficiency by upgrading infrastructure and systems to improve energy performance across campus facilities.
